### TECHNICAL SKILLS

---

- **Programming & Web Development:** Python, React, Flask, Node.js, Express, MongoDB
- **Systems, Deployment & DevSecOps:** Docker, Linux (Ubuntu), Git/GitHub, Virtual Machines, CI/CD
- **Collaboration & Documentation:** Agile/Scrum, project coordination, technical documentation, Microsoft Office

### PROFESSIONAL EXPERIENCE

---

#### Naval Facilities Engineering/Expeditionary Warfare Center

Port Hueneme, CA

Computer Science Research Assistant

October 2024 - Present

- Ensured software systems ran reliably across multiple environments, supporting consistent operation in field and offline settings using Docker.
- Worked collaboratively with cybersecurity, network, and application teams to conduct microservices integration testing and ensure they functioned securely and as intended.
- Guided a 10-member team through a technical presentation and created clear documentation to support system updates, ongoing maintenance, and issue resolution.

#### Accenture, LLC

Los Angeles, CA

Business Analyst Intern – Quality Assurance

June 2023 – August 2023

- Partnered with cross-functional teams to execute SQL queries and conduct regression testing, ensuring database functionality and seamless website deployments.
- Coordinated testing milestones and reporting schedules with Cisco and Accenture stakeholders, ensuring timely project delivery for 10,000+ monthly users.
- Proposed a VR-based educational tool in a sustainability capstone project, highlighting innovative user engagement.

#### StelEsthetics - <https://www.stelesthetics.net/>

Los Angeles, CA

Front-End Web Developer

February 2022 – Present

- Led the migration of a Webflow site to a full-stack framework architecture, defining phases and deliverables for timely completion.
- Analyzed engagement metrics using Google Analytics, implementing UX improvements that increased customer appointments by 15%.
- Collaborated with clients during monthly reviews to prioritize design updates and optimize user experience, increasing site traffic by 10%.

### MILITARY EXPERIENCE

---

#### United States Navy

Corpus Christi, TX

Hospital Corpsman

August 2008 – August 2011

- Coordinated with multidisciplinary teams and followed established protocols to support timely care and smooth operations in fast-paced environments.

### LEADERSHIP & PROFESSIONAL DEVELOPMENT

---

#### CodePath Cybersecurity Course

Los Angeles, CA

Cybersecurity Student

June 2025 – August 2025

- Completed a 10-week immersive program in cybersecurity, gaining hands-on experience in logging, incident response, intrusion detection, and threat hunting, while developing a strong foundation in security operations.
- Built detailed case study reports in Splunk Catalyst, identifying anomalies in system performance and strengthening investigative documentation skills to support incident response.
- Improved log analysis, anomaly detection, and decision-making skills using Splunk and Wireshark.

#### Association for Computing Machinery - <https://www.ecs.csun.edu/acm/>

California State University, Northridge

Front-End Web Developer

July 2024 – Present

- Developed and deployed a responsive, mobile-first website using Bootstrap, HTML, and JavaScript, enhancing accessibility for 150+ active members.
- Improved UI consistency and cross-platform performance, reducing website downtime by 20%.
- Organized and led a Python Fundamentals workshop for 30+ students, delivering hands-on instruction and guiding participants through a mini project to reinforce programming concepts.

### EDUCATION

---

#### California State University, Northridge, CA

January 2024 - May 2026

- Bachelor of Science, Computer Science

#### Rio Hondo Community College, Whittier, CA

August 2021- May 2023

- Associates of Science, Computer Information System and Mathematics
